Montevideo, Uruguay

PROFESSIONAL SUMMARY

Frontend Engineer with 5 years of experience building delightful, user-centric, and performant applications at enterprise scale. Specialized in architecting complex, interactive UIs and contributing to the design systems that power them. Proven track record of taking full ownership of product features, collaborating closely with world-class design teams, and solving deep technical challenges to deliver a polished and intuitive user experience.

SKILLS

- Typescript
- React
- Performance Optimization
- Component Architecture
- Problem-solving
- Team collaboration
- Technical documentation
- Git
- CSS/HTML

FELIX ANDERSSON

FRONTEND ENGINEER

EXPERIENCE

Frontend Product Engineer

Vairix (Client: Cisco) - 11/2023 - Present

- Architected a user-centric, non-blocking filtering experience for data tables with 100k+ rows, ensuring a fluid 60 FPS UI by rendering results progressively as the user types.
- Engineered a suite of complex, pixel-perfect data table features, consistently delivering on rigorous and challenging design requirements for our core UI components.
- Provided technical support and mentorship to hundreds of developers, ensuring consistent adoption of our design system.
- Contributed to code review standards and development processes for enterprise-scale applications.

Frontend Engineer, Product Implementation

Vairix (Client: Cisco Meraki) 08/2022 - 11/2023

- Implemented complex data table components with a focus on intuitive filtering, sorting, and export capabilities for an enterprise dashboard.
- Collaborated with a world-class design team to build and evolve an enterprise-wide design system (Magnetic), ensuring consistent and accessible user experiences.
- Created project planning and ticket breakdown for critical features, enabling parallel development and faster delivery of user-facing value.
- Assisted teams with migration from legacy UI components to the new design system, maintaining backward compatibility and a seamless user transition.

Frontend Engineer, Design System

Vairix (Client: Cisco) 08/2021 - 07/2022

- Contributed to an enterprise design system from its early stages, building reusable React components with a primary focus on accessibility and performance standards.
- Collaborated closely with the design team to translate detailed specifications into a delightful and consistent component library.
- Participated in component library testing and quality assurance processes to ensure a high-quality production release.

Frontend Engineer

Vairix (Client: Device Magic) 12/2020 - 05/2021

- Drove the user experience for complex features, including designing an intuitive UI for a webcam barcode scanner with a focused scanning area and real-time visual feedback.
- Took full ownership of the entire frontend codebase after the departure of the senior developer, becoming the de facto technical lead and driving the product to a successful MVP launch.
- Architected the core frontend for a dynamic form system, supporting unlimited nested blocks and a real-time expression evaluation engine.
- Achieved an orders-of-magnitude performance improvement for large-scale forms through deep algorithm optimization and UI refactoring.
